Minor in Professional Writing
Salem College, Winston Salem, NC
College and Departmental Honors, Summa Cum Laude, GPA 3.98

Project Experience

National Park Search Backend July 2022
National Park Service API / Axios / Express.js / Handlebars

- Collaborated with front-end developers and other back-end developers to create a website to search for national parks according to state and activity, and save favorite parks
- Built API requests with Axios for park information to be rendered on the page
- Developed system to favorite parks and display those favorites on users' dashboards

Tech Blog Using MVC Paradigm July 2022
Sequelize / Handlebars / Express-Session / Heroku

- Established server and deployed application to Heroku, a cloud application platform
- Created models for Articles, Comments, and Users, and established their relationships
- Rendered database information to the page using Handlebars as a templating language
- Styled and adjusted layout of pages using CSS

Content Management System for Employees July 2022
MySQL / Inquirer / Node.js

- Outlined models for department, role, and employee information within database
- Constructed command-line application to add, view, and update departments, roles, and employees in the database

Historical and Current Map Search Engine June 2022
Library of Congress API / Leaflet API / Open Weather API

- Worked within a small team to create a website to search for current and historical maps
- Created function to get latitude and longitude of queried city using the Open Weather API
- Utilized the Library of Congress API to populate historical map search results
